Forensic Fire Investigation

Our team of fire investigation experts can arrive on-site quickly and have the knowledge required to conduct and manage complex fire investigations. We strive to provide the best possible evaluations with access to the latest technologies, including 3D imaging and UAV.

HOW WE STAND OUT

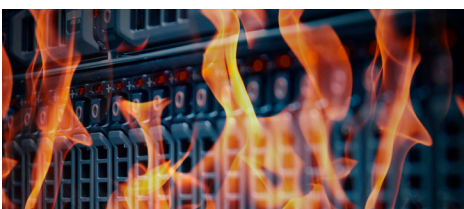

Large fire and explosion losses, in particular, pose a number of challenges. That's where years of experience, access to numerous experts that can arrive on-scene quickly, and the knowledge to manage extremely high levels of evidence is vital.

Our multi-disciplinary team has worked massive origin and cause investigations, from multi-million-dollar cases to \$500M cases, in manufacturing facilities, warehouses, power production, refineries, and more. From loss of life to loss of business, we've been there for our clients, and their clients, through the worst of times.

No matter the size or severity of the fire, our goal is to provide a high quality and seamless investigation from the initial site inspection through the claims process, evidence handling, and any potential subrogation or litigation support necessary.

OUR DIFFERENTIATORS:

- » Multidisciplinary large loss project management for more than 30 years
- » Highly experienced in the industry and can provide expert witness testimony for any incident
- » Employ hundreds of investigators, experts, and engineers all over the globe
- » Investigators have a law enforcement or fire background, which means they also have long-standing relationships with local, state/region, and national agencies
- » Highly experienced in working complex scenes with multiple parties

International Capabilities

Our experts have worked with companies around the world, including some of the most well-known Fortune 500 companies. We've conducted investigations for the U.S. Navy and led investigations for two of the largest wildfires documented in the western hemisphere. We've been to Columbia, Haiti, and Croatia. We've traveled from Georgia to France, from St. John to the UK. We are here to assist with cases no matter where in the world those services are needed.

Fire and Explosion Investigations

- » Correctional Facilities
- » Energy (Power Production/Refineries)
- » Healthcare
