

PROFILE

Mr. Jason Conley has been a Digital Forensics Examiner since 2003. During this time, Jason has provided computer forensic services and cyber-investigation support to a wide array of clients, including corporate directors & security management, law firms, insurance companies, government agencies, private investigation firms, forensic accountants, and business owners & managers in the Greater Toronto Area and across Canada.

Many of these examinations have warranted or strengthened “for cause” terminations during active employee investigations, and conversely, thwarted wrongful dismissal lawsuits. He has testified in court and union arbitrations on computer forensics, internet-based investigations, and e-discovery issues. His workmanship has been instrumental in successfully executing remedial court orders, some of which have been Anton Piller (civil search warrant) orders. Jason specializes in industrial espionage, Intellectual Property Theft, breach of contract, and fraud-related investigations.

Jason is responsible for providing digital forensics and data loss consulting/claim review services in Canada. He also assists in business development and team growth as Envista expands its reach across Canada and worldwide.

Key strengths include the following:

- ▶ Computer Forensics
- ▶ Cyber / Privacy Breaches
- ▶ Civil Litigation Support
- ▶ Security Management
- ▶ Mobile Forensics
- ▶ Claim Reviews
- ▶ Data Loss Consulting
- ▶ Digital Forensics

LICENCES

Ministry of Community Safety and Correctional Services, 2021

Private Investigator

PROFESSIONAL AFFILIATIONS

- ▶ ISACA (Information Systems Audit and Control Association)
- ▶ ASIS International
